

APAC Cybersecurity — July 2026

12 Countries · Asia-Pacific Region · Board-Level Briefing

India and China drove the region's sharpest severity spikes this month, with cloud misconfiguration the dominant vector.

HIGHEST SEVERITY

India and China reported the highest concentration of critical-severity incidents this month.

CROSS-BORDER PATTERN

LockBit-affiliated ransomware activity was referenced in three separate markets' reporting.

REGULATORY WATCH

Singapore, Australia, and South Korea each advanced tighter breach-notification requirements.
